

RetailMind AI Customer FAQ

RetailMind AI Knowledge Base Document

Purpose

This FAQ provides general knowledge for the Smart Retail Assistant customer Q&A system.

What RetailMind AI Can Help With

- Demand forecasting for future units sold.
- Anomaly detection for unusual sales, revenue, conversion, or campaign behavior.
- Sales analytics such as total revenue, top category, top region, and anomaly count.
- Customer support questions related to returns, refunds, products, discounts, and availability.

Common Customer Questions

- What is the return policy?
- Is this product eligible for refund?
- Are festive discounts available?
- Which product category has highest revenue?
- Can the system detect unusual campaign behavior?

System Limitations

- The assistant should not answer unrelated questions outside the retail domain.
- The assistant should not provide hacking, credential theft, or database misuse guidance.
- If a question is unrelated, the guardrail response should be returned.

RAG Usage

This FAQ should be retrieved for broad questions about what the assistant can do, supported features, limitations, and general customer support scope.
