

Retail Return and Refund Policy

RetailMind AI Knowledge Base Document

Purpose

This document defines the return, replacement, and refund rules used by RetailMind AI for customer support questions.

Return Eligibility

- Customers can return damaged or defective products within 7 days of delivery.
- Return requests must include order ID, product ID, reason for return, and product condition.
- Perishable products are not returnable unless they are damaged during delivery.
- Products must be returned with original packaging where applicable.

Refund Rules

- Refunds are processed after product verification by the store team.
- Approved refunds are usually processed to the original payment method.
- Refunds may be rejected if the product is used, altered, or outside the return window.

Replacement Rules

- If stock is available, damaged products can be replaced instead of refunded.
- Replacement priority is given to essential grocery and daily-use products.
- If replacement stock is not available, the customer can choose refund processing.

RAG Usage

When a customer asks about damaged products, return timelines, refund status, or replacement eligibility, the Document Assistant Agent should retrieve this policy and answer only from this context.
